Rana Arvindbhai

Software Engineer I – Cybersecurity (IAM) @ Travelers | Identity Governance

Manchester, Connecticut, United States

Summary

As a Software Engineer I at Travelers, I contribute to the Cybersecurity IAM team, focusing on enterprise-level identity and access governance. My work involves onboarding with SailPoint Identity Security Cloud (ISC) to design and implement secure identity solutions that emphasize compliance, provisioning automation, and identity analytics. Collaborating with security architects and engineering teams, I help enhance IAM capabilities and ensure adherence to access control policies.

With a Bachelor of Science in Computer Science from the University of Greenwich, my career has been shaped by roles emphasizing scalable enterprise solutions. My expertise in Identity and Access Management (IAM) and cybersecurity complements my dedication to developing secure, innovative systems that meet enterprise needs.

Experience

Travelers

Software Engineer I – Cybersecurity (IAM)

March 2025 - Present (1 year 7 months)

Hartford, CT

Working in the Cybersecurity IAM (Identity and Access Management) team to support enterprise-level access governance and identity lifecycle processes. Currently onboarding with SailPoint Identity Security Cloud (ISC) to design and implement secure identity solutions, focusing on compliance, provisioning automation, and identity analytics. Collaborating with security architects and engineering teams to enhance IAM capabilities and ensure adherence to access control policies.

Genworth

Java Full Stack Developer

March 2022 - November 2024 (2 years 9 months)

Glen Allen, Virginia, United States

Developed scalable cloud-native microservices using Spring Boot and Java 17, transforming monolithic architecture to microservices. Built Angular 12 SPAs and integrated them with REST APIs. Automated deployments using Terraform and Jenkins on AWS (EC2, ECS, Lambda). Worked with Kafka for real-time data streaming, Selenium for UI automation, and contributed to Agile sprints delivering high-quality enterprise solutions.

DRW

Java Full Stack Developer

January 2020 - February 2022 (2 years 2 months)

Houston, Texas, United States

Designed and built financial applications using Spring Boot and AngularJS. Developed RESTful APIs and cloud-native microservices with emphasis on modular architecture. Integrated JAX-WS services, built reusable Angular components, and implemented CI/CD pipelines using Jenkins and JSON-based CloudFormation. Collaborated closely in Agile teams to enhance system performance and scalability.

Vern Fonk

J2Ee Developer

August 2019 - December 2020 (1 year 5 months)

Lynnwood, Washington, United States

Built dynamic web interfaces using AngularJS, JavaScript, and AJAX. Developed backend services using Spring and Hibernate. Integrated SOAP/REST APIs and improved UI responsiveness with jQuery and Bootstrap. Contributed to the redesign of the insurance platform to enhance user experience

Education

University of Greenwich

Bachelor of Science (B.Sc.), Computer Science · (January 2015 - July 2018)
